

The Lane Council of Governments is leading an Oregon Department of Transportation funded study of public transportation needs and options between Florence and Eugene. This project began after hearing from community members within this corridor that affordable public transportation was needed but unavailable for job commute, personal needs, recreation and medical trips.

The purpose of this survey is to gather feedback about how, when, why and if public transportation would be used between Florence and Eugene. The results will remain anonymous but will be used to guide the project direction and will be included in the final project report. Next steps after this study will include working with potential partners who could provide public transportation service and seeking funding to implement a service.
